Canadian permanent resident | Authorized to work in Canada without sponsorship

PROFESSIONAL SUMMARY

Full-stack software developer with three years of professional and freelance experience building web applications, content platforms, marketplaces, payment integrations, and self-hosted infrastructure. Works across TypeScript, React, Next.js, Angular, Node.js, databases, and headless CMS platforms, taking client projects from requirements through deployment and support.

CORE TECHNOLOGIES

Frontend TypeScript, JavaScript, React, Next.js, Angular, React Native, Expo, Tailwind CSS

Backend and APIs Node.js, NestJS, Fastify, Express.js, REST APIs, Java, Spring Boot

Data and CMS PostgreSQL, MongoDB, MySQL, SQL Server, SQLite, Drizzle ORM, Prisma, Firebase, Payload CMS, Strapi

Delivery and Integration Docker, Linux, VPS, Nginx, PM2, Git, Stripe, Clerk, Better Auth, Supabase, TanStack Query

TECHNICAL EXPERIENCE

Freelance Full Stack Web Developer | Workana and Independent Clients

Remote | July 2024 - December 2025

- Delivered production web applications for food services, sports analytics, and nonprofit clients, covering requirements, frontend and backend development, integrations, deployment, and ongoing support.
- Built Tipstertotal, a sports analyst marketplace with Next.js, MongoDB, Stripe, Wise API, Clerk authentication, and Socket.io; managed deployment and operations on an Ubuntu VPS with Plesk.
- Developed Comidas Bracamonte with Next.js and Strapi, providing responsive pages, search-friendly content, CMS-managed updates, and production hosting and database administration.
- Delivered a digital platform for Madres de la Leche using Next.js, Payload CMS, and Stripe to support content publishing, organizational communication, and online transactions.
- Created a services directory with Angular, TypeScript, Firebase Firestore, and Cloud Storage.

Information Technology and Programming Expert | Innovative Ideas LLC

Remote, Puerto Rico | June 2023 - July 2024

- Contributed to frontend and backend development for the YiiES platform as part of a distributed team using Angular and Express.js.

TECHNICAL EXPERIENCE CONTINUED

IT Specialist | UEB Confecciones Tropicales

Mayabeque, Cuba | January 2023 - April 2024

- Supported business operations through hardware and software installation, network maintenance, and administration of Windows Server and SQL Server environments.

SELECTED PROJECTS

Gas Tracker | github.com/danny1998cuba/gas-tracker

Built an offline-first mobile application for recording work trips, calculating fuel costs and driver balances, tracking payments, generating reports, and managing local backups and data import and export.

Technology React Native, Expo Router, TypeScript, Drizzle ORM, SQLite, TanStack Query, React Hook Form, Zod

CoreX4Dev | corex4dev.com

Created and maintain a Spanish-language technical platform featuring software projects, open-source resources, and practical content about headless CMS platforms, payments, authentication, and full-stack development.

Technology Next.js, React, technical writing, developer education

ADDITIONAL EXPERIENCE

Assistant Team Leader | Dollarama

Kingston, Ontario | December 2025 - Present

- Coordinate daily store workflows, resolve customer and operational issues, support inventory processes, and help the team maintain accuracy in a fast-paced environment.

EDUCATION

Bachelor of Computer Engineering | Agrarian University of Havana

Mayabeque, Cuba | 2017 - 2022

- Studied data structures, databases, web development, servers, networking, and Java; built contract management and HR systems during a practicum using Angular, Java REST APIs, and MySQL.

Computational Intelligence Coursework | University of the Amazon

Remote, Colombia | 2022

- Studied machine learning, natural language processing, and neural networks using Python.

CERTIFICATIONS AND LANGUAGES

Certifications Full Stack Open, University of Helsinki, 2025 | IELTS General Training, overall band 7.5, 2025

Languages Spanish, native | English, advanced professional proficiency
